introduction

Joseph Zilber's Forward1

overview

Executive Summary5
 What Makes a Site and Building Sustainable7
 Why Sustainability Is Important10
 Measurable Costs and Benefits10
 Economic Development16
 Human Aspects19
 Site Design and Planning21
 Water Management22
 Energy23
 Materials + Resources24
 Indoor Environmental Quality25
 Footnotes26

implementing sustainability at The Brewery

LEED-ND

Defined28
 Translating existing sustainable strategies successfully to your project30
 Social Sustainability: enhancing social systems by integrating with the environmental & economic systems in a new development30

Guidelines Goals

Required Guidelines Overview34

design process

Goal Setting, Cost Benefit Analysis37
 Team Development38
 Well-Integrated Design39
 Resource Management43

technical guidelines

Required Guidelines47

Performance Management

Guideline Management50
 Planning for Conservation52
 Design and Construction Commissioning53
 Operations Commissioning57
 Lowest Life Cycle Cost58

Site Design and Planning

Understanding the Site62
 Compact Development/Diversity of Uses63
 Building/Site Relationships + Building Usage65
 Heat Island Reduction69
 Sustainable Landscape Practices72
 Alternative Transportation and Community Proximity74

Water Management

Sustainable Alternatives for Roof Stormwater79
 Managing Site Stormwater84
 Building Water Efficiency87

Energy

Energy Efficiency in Buildings91

Materials + Resources

Building and Material Reuse105

Infrastructure Material Use106

Building Material Use108

Comprehensive Waste Management110

Indoor Environmental Quality

Indoor Environmental Quality113

Human Aspects

Health and Well-Being126

Productivity129

Absenteeism/Turnover130

Biophilia/Ecopsychology132

Construction Administration

Construction Waste Management136

Operations and Maintenance

Site and Landscape Elements139

Building Systems141

Custodial Operations144

to LEED® or not to LEED®

Pros and Cons of LEED Certification150

Other Green Building Rating Systems150

metrics and funding

Potential Performance Indicators153

Project Lifecycle Costs154

Building Value Impacts155

Marketability156

Human Impacts and Related Cost157

Environmental Impacts158

Community Impacts and Related Cost160
